Fred Burr Dam Spillway Repairs

Hamilton, Montana (October 1, 2019) – The Stevensville Ranger District is advising recreationists that Montana DNRC will be making repairs to the Fred Burr Dam starting this week. The project is scheduled to last for several weeks (weather permitting) and includes repairing a tilting concrete spillway wall. Crews will also install a new gravel drain behind the wall to collect seepage.

Hikers, riders, and hunters using the Fred Burr Trail #38 southwest of Victor will likely notice some equipment and supplies being hauled up to the reservoir, beginning this week. Fred Burr Reservoir which supplies water for irrigation purposes is located approximately 4 miles up canyon from the trailhead.

For more information, contact the Stevensville Ranger District at (406) 777-5461.
