Sure! They need to know that they are speaking for themselves and not the people of Ravalli County.

Hi Carlotta,  
This is the note that I sent to Daines this afternoon;  
Senator Daines,  
About that letter from the Ravalli County Commissioners dated Sept 2017? I wouldn't place too much credence on it if you thought that it represents the position of Ravalli County Citizens as a rule of thumb. Seems that the Ravalli County Commissioners are tendering their personal opinions in lieu of the reality of actually representing Ravalli County residents. Seems that over 73% of the people that testified (55 of 75) were in favor of pulling the letter of support that you received. Additionally, of the letters submitted (total of 125) there were over 62% (78 not supporting, 31 in support and 16 somewhere in limbo) that did not support the letter that the commissioners sent to you.  
I can recognize that you can appreciate having a fan club such as the present members of the County Commission seem to be-I mean heck!

Anyone would appreciate receiving applause for actions you have taken. I can remember my kids applauding our grandchildren's having a solid BM. This sure seems like a participation award though-in my opinion anyway. Senator, I think my message to you on this is simply; don't for a minute accept the letter from the Ravalli County Commissioners as anything more than their personal opinions as expressed from a petition served to your office. Gosh! You know this is almost as embarrassing as having you purport to represent Montana when you vote for stupid things! This having to apologize for the antics of the county commissioners! I suppose that I am sharing an empathy cushion with you and #45 as the leader of your party eh?

OK, just wanted to assure you that the majority of Ravalli County, your constituents, don't feel the same about your WSA bill as the commissioners. Most of us can tell when we are being sold a bill of defective goods.
