

To whom it concerns.

Can anyone tell me how this all works. All these school bonds and all these General contractors get the job managing and doing work themselves? Why is it they the General contractors, Sletten, Jackson. get these projects then they drag out paying the subcontractors? Jackson for a fact is dragging out there subcontractors 100 days if not longer? Why and how are you all in control letting *this happen*? Would you all like to see your pay checks held for 100 days? Why is it the small contractors are screwed over and made to wait. Jackson is famous at lying and cheating their way to the top. Missoula airport job had to be liens filed by subs because Jackson took so long. Why? It's not up to these smaller companies to have to go borrow beg and steal from peter to pay Paul? It's wrong and it seems like everyone involved sitting back getting there crooked politician asses paid off and to hell with everyone else. I will keep sending this letter out until i find the right attorney or a decent politician that can see farther than there wallet.
