

Dear Board of Commissioners of Ravalli County,

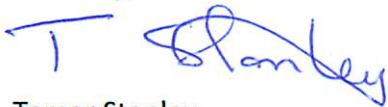

The Ravalli County Museum would like to take this opportunity to thank you for the most recent improvements to the safety, appearance, and functionality of the Museum. The new flooring project just getting underway will have a marked effect on the public. Our residents, their children and our scholastic partners in academic world; not to mention the thousands of visitors traveling through our area, will recognize the care and foresight with which this noteworthy Museum is valued by our local government.

We are housed in a County building, and your genuine regard for this structure, and by association the institution housed within, demonstrates the endorsement and then investment by "the powers that be". The much needed flooring upgrade not only cures many safety issues but enhances the presence and purpose of the space. This installment will last for many generations. Our community at large and the people looking to utilize the research archives, exhibits and learning experiences that we make accessible; will find the galleries and audience spaces more welcoming and open to a myriad of uses.

As the Museum Board and the County Commission continue to use the MOA as a stepping stone to successful partnerships we recognize it takes a vision and a sense of goodwill for things to truly move from notion to reality. We thank you for your earnest commitment, and positive outlook -- with an eye to the long view.

As always, I DO encourage you all to come and visit the Museum, take a field trip and enjoy... There IS always something new to see and learn and do... It is, after all, YOUR local Museum and one we feel (*we work hard to deliver...*) has the capacity to enrich the life of our population.

Sincerely,

Tamar Stanley
