During recent discussions with one of the candidates for HD30, she has said "It's all about the money." I couldn't agree with her more. But the importance lies in the source of the money and what the intent of the funding is. If the money is coming from somewhere that has no skin in the game and the intent, even if it is an 'unintended' consequence is the economic devastation of boots on the ground, ~~multiple~~ multi-generational Montanans ~~then~~ through the funding of lawsuits and over regulation. ~~then~~ this funding source must be stopped. The greatest treasure of this state is its people - not wildlife, fish or open spaces.

I commend you for doing what is within your power to launch this investigation.

Thank you
