Subject: Roundup/glyphosate

Dear Ravalli County Board of Health and Ravalli County Commissioners,

Glyphosate was just found guilty of causing cancer, by a jury, after looking at many studies, coverups by Monsanto, fraudulent studies done to get Roundup registered in the first place, and other evidence. It is a major news story. A couple years ago, I and the people I worked with on two studies were accused of being on a "witch hunt" against Roundup by a Ravalli County BOH member. Hey Ho, Hey Ho, the wicked witch (glyphosate) was pronounced guilty. Now we just need to drop a house on it. Banning it would be better, so newborn animals of all kinds including children can be born without birth defects and other serious health issues, including propensity for getting cancer. How soon can you ban Roundup use in Ravalli County? That would be a very good start.

Sincerely,
Judy Hoy
