D. Slagle

This is nothing more than sidestepping the law, money laundering, a shell game. The federal government can't buy land from private concern, but is allowed to purchase from non profit. SO a non profit buys it and then sells to government?? Is that the case here? Why do we allow breaking the law?

This is a city matter, county commissioners and OLB should not be involved. PERIOD.

Are there restrictions placed by seller? That should not be allowed. Who owns this property and what are their goals? And why am I expected to fund this?

It seems to be shifting a lot of stuff, taxes, profits, resources, maintenance costs, "ownership", etc

We don't see how this benefits us and our tax dollars. But it certainly affects us! And not in a good way

BOTTOM LINE:

THIS IS CITY MATTER NEEDING NO COUNTY INVOLVEMENT!
