**Subject:** Stevensville Construction Update

### **ADA Sidewalks on Main Street Completed**

ADA work on Main Street in Stevensville has been completed.

### **Bitterroot Overflow Bridge**

Bridge rail replacement was completed yesterday (June 19) and traffic has been returned to normal across the bridge with both lanes open. Next week, there will be daytime single lane closures for bridge repair, cleaning, and sealing.

### **Kootenai and McCalla Creek Bridge Repair**

After finishing work on the Bitterroot Overflow Bridge, MDT will be cleaning, repairing, and sealing bridges over Kootenai Creek and McCalla Creek on Hwy 93. This work will require day time single lane closure which will be scheduled to minimize impact on rush hour traffic (no northbound closures in the morning and no southbound closures in the evening).

**For more detailed project information please visit our websites:**
