**Subject:** Bridge work this week in Stevensville

### Stevensville Stakeholders:

Bridge repair work begins today near Stevensville and is expected to last 7-10 days on the Bitterroot Overflow Bridge on the East Side Highway (Route 269) and McCalla Creek Bridge and Kootenai Creek Bridge on US 93. Crews will be repairing and sealing the Bitterroot Overflow Bridge and sealing the McCalla Creek Bridge and Kootenai Creek Bridge. The traveling public should expect minor delays with traffic reduced to a single lane utilizing a traffic signal. In order to avoid disruption to commuters there will be no northbound closures in the morning and no southbound closures in the afternoon/early evening.
